

MOVE AGAIN

Donna began experiencing pain a couple of years ago. It got so bad that one day she was unable to get out of her car.

“I’m so thankful I found out about the anterior approach to hip replacement. I almost didn’t know I had a choice. Thanks to Dr. Naide, my recovery was quick and easy – I was back to yoga in just 3 ½ weeks.”

-Donna Zappin

The Joint Replacement Center at North Broward Medical Center features the specially designed hana table, which allows surgeons to replace the hip without cutting any muscles, resulting in a faster recovery, less pain, smaller incision and less scarring. The experienced orthopedic surgeons at North Broward Medical Center have performed more anterior hip replacement surgeries using the hana table than any other area surgeons.

Why wait? Get back to doing the things you love, again.
