

Computer Assisted Knee Replacement Surgery

State of the Art Technology

The goals of the East Coast Orthopaedics surgeons, Dr. Janke and Dr. Naide, are *to reduce the debilitating joint pain and improve the quality of life for their patients.* Both Doctor Janke and Dr. Naide are among a very exclusive group of surgeons who have advanced training in computer navigation surgery and utilize this technique in the operating room. The objective of computer-assisted surgery is to combine the precision and accuracy of computer technology with the surgeons' skill and expertise. As a result, Dr. Janke and Dr. Naide are able to achieve alignment of implants with a degree of accuracy not possible with the naked eye. This surgical procedure affords their patients enhanced results and recovery and a quick return to normal life. The surgeons of East Coast Orthopaedics are renowned for their caring approach and unparalleled expertise.

Some benefits of Computer Assisted Knee Replacement Surgery:

- Better balance and positioning of prosthesis
- More accurate placement and alignment of prosthesis
- Better functioning knee
- Return to an active lifestyle

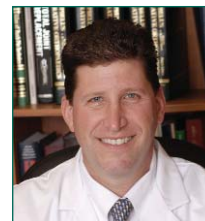

YOU'VE SUFFERED LONG ENOUGH.... IT'S TIME TO CHANGE YOUR LIFE AND GET BACK TO BEING YOU, AGAIN!
